

Key Points:

- Remember like hotel reservation:
 - Getting **into a hotel** is Profile access (You have a booking, but you don't know which room you will get exactly!).
 - Getting the **exact** room key to enter is record level access.
- Record Level Security is also known as record sharing rules, basically whom you want to share records with.
- In Profiles and Fields- Most restrictive wins
- In record level security – Most permissive wins

Exercise:

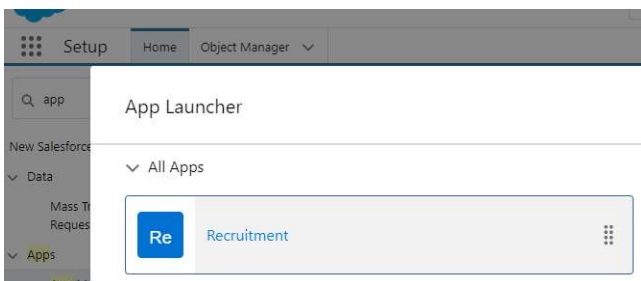

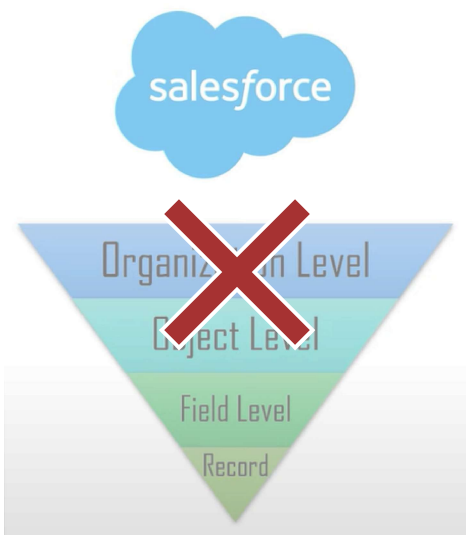

The data security is confusing unless you **PRACTICE** a couple of times. Below is one simple example to get clarity on the data security model in Salesforce.

Let's work on a simple recruitment app where we can practice all these data security concepts. Let's create the data below data and jump into various scenarios and verify our configuration.

Step 1: Create an Ap

Step 2: Create Roles:

SETUP Roles

Creating the Role Hierarchy

You can build on the existing role hierarchy shown on this page. To insert a new role, click **Add Role**.

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Step 11: Set up Organization Wide Defaults

Check Grant Access Using Hierarchies

SCandidate	Public Read Only	Private	☒
SPosition	Private	Private	☒
SCandidate	Public Read Only	Private	☒
SPosition	Private	Private	☒

Now, it's testing time!!!

Step 12: Login with each recruiter and create 1 record in each object (SPositions and SCandidates) and login as individual users and verify the records. You should see exactly as mentioned below! - So simple, right?

	Candidate Object		Positions Object	
User	Records Created by US Recruiter	Records Created by India Recruiter	Records Created by US Recruiter	Records Created by India Recruiter
US Recruiter	Read/Write	Read Only	Read/Write	No Visibility
India Recruiter	Read Only	Read/Write	No Visibility	Read/Write
Recruitment Manager	Read/Write	Read/Write	Read/Write	Read/Write

Check Permission Set usage for Recruitment Manager

Step 13: Let's practice Sharing rule: Share US Recruiter Position records as Read only to all Recruiters

You should see exactly as mentioned below!

	Candidate Object		Positions Object	
User	Records Created by US Recruiter	Records Created by India Recruiter	Records Created by US Recruiter	Records Created by India Recruiter
US Recruiter	Read/Write	Read Only	Read/Write	No Visibility
India Recruiter	Read Only	Read/Write	Read	Read/Write
Recruitment Manager	Read/Write	Read/Write	Read/Write	Read/Write

Step 13: Let's practice MANUAL sharing rule: Share India Recruiter Position records manually with Read/Write permission to US Recruiter only.

You should see exactly as mentioned below!!!

	Candidate Object		Positions Object	
User	Records Created by US Recruiter	Records Created by India Recruiter	Records Created by US Recruiter	Records Created by India Recruiter
US Recruiter	Read/Write	Read Only	Read/Write	Read/Write
